The Information We Collect

This privacy policy has been compiled to better serve those who are concerned with how their 'Personally Identifiable Information' (PII) is being used online. PII, as described in US privacy law and information security, is information that can be used on its own or with other information to identify, contact, or locate a single person, or to identify an individual in context. Please read our privacy policy carefully to get a clear understanding of how we collect, use, protect or otherwise handle your Personally Identifiable Information in accordance with our website.

We at Saasketeer are committed to safeguarding the privacy of our website visitors and service users.
This policy applies where we are acting as a data controller with respect to the personal data of https://Saasketeer.com; in other words, where we determine the purposes and means of the processing of that personal data.
We use cookies on our website. Insofar as those cookies are not strictly necessary for the provision of https://Saasketeer.com we will ask you to consent to our use of cookies when you first visit our website.
Our website incorporates privacy controls which affect how we will process your personal data.

Saasketeer gathers two basic types of information through the Website:

"Personal Information", being information from which an individual can be identified, and "Aggregate Information", from which an individual can not be identified.

Personal Information:You are not ordinarily required to register or provide Personal Information in order to access our Website, though certain functionalities (such as requesting information or providing feedback through the site through email) may require the inclusion of Personal information. Personal information may include your contact information (such as your name, postal address, telephone numbers and/or email address).

Aggregate Information:When you visit and interact with the Website, Saasketeer and third parties with whom Saasketeer has contacted to provide services to Saasketeer may collect anonymous information from three sources: server log files, cookies, and "pixel tags".

Server Log Files:Your Internet Protocol (IP) address is an identifying number that is automatically assigned to your computer by your Internet Service Provider (ISP). This number is identified and logged automatically in our server log files whenever you visit the Website, along with the time(s) of your visit(s) and the page(s) that you visited. We use the IP addresses of all Visitors to calculate Website usage levels, to help diagnose problems with the Website's servers, and to administer the Website. We may also use IP addresses to communicate or to block access by Visitors who fail to comply with our Terms of Service. Collecting IP addresses is standard practice on the Internet and is carried out automatically by many websites.

Cookies:Cookies are data that a web server transfers to an individual's computer for record-keeping purposes. Cookies are an industry standard used by most websites, and help facilitate users' ongoing access to and use of a particular website. Cookies do not cause damage to your computer systems or files, and only the website that transfers a particular cookie to you can read, modify or delete such cookies. If you do not want information collected through the use of cookies, there are simple procedures in most browsers that allow you to delete existing cookies, to automatically decline cookies, or to be given the choice of declining or accepting the transfer of particular cookies to your computer. You should note, however, that declining cookies may make it difficult or impossible for you to use portions of the Website.

Pixel Tags:The Website may use so-called "pixel tags", "web beacons", "clear GIFs" or similar means (collectively, "Pixel tags") to compile aggregate statistics about Website usage and response rates. Pixel Tags allow us to count users who have visited certain pages of the Website, to deliver branded services, and to help determine the

effectiveness of promotional or advertising campaigns. When used in HTML-formatted email messages, Pixel Tags can tell the sender whether and when the email has been opened.

The Way We Use Information

The Personal Information that is collected through our website may be used in any of the following ways:

Communications:We may use your personal information in order to respond to your questions and comments. We use return email addresses to answer the email we receive. Such addresses are not used for any other purpose and are not shared with outside parties.

Requests – We use the information you provide about yourself when placing a request only to complete that request. We do not share this information with outside parties except to the extent necessary to complete that request.

Subscriptions:You can register with our website if you would like to receive additional information or apply for jobs. Information you submit on our website will not be used for this purpose unless you fill out the registration form. We do not share this information with outside parties except to the extent necessary to complete that request. Should you like to withdraw this request, you can do so at any time.

The aggregate information we collect through the website is used to better design our website. We analyze Aggregate information in order to enhance website security, track the popularity of certain pages of the Website, the success of our email notifications, traffic levels on the Website and other usage data, all of which helps us to provide content tailored to your interests, improve the Website and related services and to

otherwise enhance your experience on the Website. For example, we may understand that X number of individuals visited a certain area on our website, or that Y number of people applied for jobs, but we would not disclose anything that could be used to identify those individuals.

We never use or share the personally identifiable information provided to us online in ways unrelated to the ones described above without also providing you an opportunity to opt-out or otherwise prohibit such unrelated uses.

Our Commitment to Data Security

We honor Do Not Track signals and Do Not Track, plant cookies, or use advertising when a Do Not Track (DNT) browser mechanism is in place.

To prevent unauthorized access, maintain data accuracy, and ensure the correct use of information, we have put in place appropriate physical, electronic and managerial procedures to safeguard and secure the information we collect online.

Google Analytics data is queried directly from the Google Analytics API through a secured connection. It is stored temporarily on our servers while we process the data and is deleted shortly after the report is generated. We keep all API credentials encrypted. Data cannot be access by other users and is deleted shortly after the report is run. Saasketeer stores basic metadata such as total monthly sessions for billing and administrative purposes.

COPPA (Children Online Privacy Protection Act)

When it comes to the collection of personal information from children under the age of 13 years old, the Children's Online Privacy Protection Act (COPPA) puts parents in control. The Federal Trade Commission, United States' consumer protection agency, enforces the COPPA Rule, which spells out what operators of websites and online services must do to protect children's privacy and safety online.

We do not specifically market to children under the age of 13 years old.

Accessing Information & Contacting Us

Saasketeer has procedures in place to keep your Personal Information accurate, complete and up-to-date for the purposes for which it is collected and used. You can review the information we have collected and where appropriate, you may request that it be corrected. We also provide you with several options for reviewing, correcting, updating or otherwise modifying information you have previously provided:

You may email us at: contact@Saasketeer.com

You may call us at +972-52-8820509

Elifelet ST. 26
Tel Aviv, Israel 6608026
Israel

To protect your privacy and security, we take reasonable steps to verify your identity before granting access or making corrections. Note that despite any removal of or change to Personal Information requested there may also be residual information that will remain within our databases and other records.
